

SBIR - STTR: Advancing Medicine Through Innovation

The NIH Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs award federal research grants to small businesses conducting biomedical research. The purpose of these programs is to spur technological innovation and help the federal government meet its research and development (R&D) needs, with the ultimate goal being commercialization of these innovative technologies and improved public health.

NIH's SBIR and STTR Programs Can Help Your Small Business Receive R&D Funding

Follow these steps to find out how to get started on your application:

Determine which Funding Opportunity is Best Suited for You

Funding Opportunity

Announcements (FOAs):

SBIR (PA-14-071) and STTR (PA-14-072)

- NIH is interested in YOUR research ideas - apply using the Omnibus solicitation

FOAs:

- Issued by NIH's Institutes and Centers (ICs)

Decide between SBIR and STTR Funding

SBIR:

Principal Investigator: Must be employed by the small business

Research Partner: Research partner optional, total effort up to 33% for Phase I and 50% for Phase II

STTR:

Principal Investigator: Can be employed by the small business or a non-profit research institution

Research Partner:

Required. Formal collaborative effort between small business (minimum 40%) and research institution (minimum 30%)

Submit Your Application Early
